

Your analysts spend nights formatting CIPs, **not thinking about the deal.**

Pureblue builds AI teammates for mid-market investment banks and PE firms. CIP drafting, consolidated financials, and company research — done by a role-trained AI analyst inside controlled, reviewable workflows. In production with a mid-market investment bank today.

MEET YOUR NEW TEAMMATE

Deal-Team Analyst

Assembles CIP sections from data-room documents, builds consolidated financials from messy Excel, and drafts company and sector research your senior bankers review instead of write.

CIP / CIM Builder

TODAY

Analysts burn 60–80 hours per deal assembling, formatting, and version-wrangling the confidential information presentation.

WITH PUREBLUE

The AI teammate drafts CIP sections directly from the data room — company overview, financials, market sizing — and your team edits instead of assembles.

Consolidated Financials

TODAY

Multi-entity financials arrive as inconsistent spreadsheets that take days to normalize.

WITH PUREBLUE

Statements are parsed, mapped to a standard chart, and consolidated with every number traceable back to its source file.

Company & Sector Research

TODAY

Comps, precedent transactions, and industry context are rebuilt by hand for every pitch.

WITH PUREBLUE

Sector valuation context, NAICS-aligned comps, and M&A activity are compiled automatically and kept current for every live deal.

Proven on live deals

A mid-market investment bank

In production with a mid-market investment bank, with the deployment expanding

CIP-builder and consolidated-financials workflows productized from real engagements

Deterministic, reviewable outputs — built for a business where a wrong number kills trust

Fixed-scope implementation

We design, build, and deploy your first AI teammate and its workflows — live in weeks, not quarters.

Platform subscription

Hosting, models, monitoring, and continuous improvement included. Priced against a hire, not a software seat.

Augmentation, not replacement

Your people handle judgment calls; the AI teammate handles the repetitive work between them.
