pureblue.ai

Booking Coordinator — your first AI teammate

Every missed call is a truck that leaves half empty.

Pureblue builds AI teammates for junk removal and hauling companies. Booking, photo-based quote ranges, truck and crew scheduling, and the donation and recycling paperwork after the job — handled by role-trained AI inside deterministic workflows, built with Junkluggers.

MEET YOUR NEW TEAMMATE

Booking Coordinator

Answers customers by chat, text and phone, gives a price range from a photo of the pile, books the arrival window, and keeps each truck's day full — around the clock.

Booking & Quote Ranges

TODAY

Customers call while crews are on a job, nobody picks up, and the lead books with whoever answered first.

WITH PUREBLUE

An AI teammate answers by chat, text or phone, reads a photo of the pile to give a truckload price range, checks the service area, and books an arrival window — 24/7.

Truck & Crew Scheduling

TODAY

The schedule lives on a whiteboard, same-day requests get squeezed in by phone tag, and trucks run half full between stops.

WITH PUREBLUE

Jobs are slotted by zone, estimated load size and crew availability, same-day requests fill the gaps, and anything that doesn't fit is escalated to a person instead of double-booked.

Donation, Recycling & Follow-Up

TODAY

Donation receipts, disposal tickets and review requests get done at the end of the week, if at all.

WITH PUREBLUE

After each job the customer gets the invoice, the donation receipt and a review request, and disposal and recycling records are logged against the job — with a full audit trail.

Built on real operations

Junkluggers

✓ Booking, scheduling and follow-up workflows built with Junkluggers

✓ Built for how hauling actually runs: arrival windows, truckload pricing, same-day slots and multi-truck routes

✓ Extends naturally to dumpster rental, moving and cleanout services

Fixed-scope implementation

We design, build, and deploy your first AI teammate and its workflows — live in weeks, not quarters.

Platform subscription

Hosting, models, monitoring, and continuous improvement included. Priced against a hire, not a software seat.

Augmentation, not replacement

Your people handle judgment calls; the AI teammate handles the repetitive work between them.

See it running on work that looks like yours.
